

SENSOLEAK

A Leader in Predictive Analytics & Preventive Maintenance

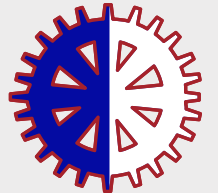

Mission

To create a new industry standard in prevention and detection of critical, environment-damaging, safety risking failures

Vision

Bring innovation to a whole new level by combining Artificial Intelligence, Machine Learning and Internet of Things

Product

Real-time machine learning monitoring system that connects seamlessly to any SCADA and analyzes the system's health in a holistic way

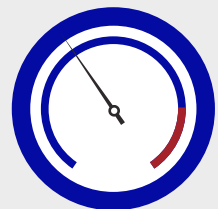

Applications

Upstream - drilling/rotating equipment

Midstream - pipelines (oil, gas, water)

Downstream - refineries, petrochemical plants

Key Benefits

Fully customizable

Very accurate analysis

Low rate of false alarms

Secure and safe

Sensor agnostic

Added Value

Significant reduction of downtime

Savings on equipment replacements

Increased asset availability

Extended equipment life

Improved profitability

Increased productivity

Smarter operations
